

```
graph LR; Actor1[Actor 1] --- UC1(( )); UC1 --- UC2(( )); UC2 -.->|<<include>>| UC3(( ));
```

Diagram illustrating a process flow involving three use cases:

- Use Case 1: Acceder identificadores persistentes
- Use Case 2: Proporcionar conjunto datos al DMP
- Use Case 3: Verificar implementacion DMP

The flow starts with an actor (Jefe investigacion) connected to Use Case 1. Use Case 1 is connected to Use Case 2. Use Case 2 includes Use Case 3, indicated by a dashed arrow labeled <<include>>.
